

Custom Sleep earplugs

Audiovox Sleep Extra Soft

Audiovox Sleep Extra Soft is Audiovox's custom sleep earplugs for you with sensitive ear canals or who wishes for comfortable and maximal noise attenuation. The sleep earplugs are individually customized to fit your ear canals which allows them to completely close off your ear so they don't fall out during the night which is often an issue with regular earplugs.

They are produced in the softest, medical silicone which makes them suited for you who cannot use other custom earplugs. The extra soft, medical silicone allows for you to sleep with them through the entire night without discomfort or irritation. Furthermore, the soft silicone allows for you to sleep on either side without being able to feel the earplugs which is often an issue with other earplugs.

Audiovox Sleep Extra Soft provides extra attenuation of both high- and low frequency sounds which are not usually attenuated by cotton or regular earplugs. With a set of Audiovox Sleep Extra Soft earplugs, say goodnight to waking up during the night with sore ear canals, noise from the street or snoring for your partner.

Usage:

- People with sensitive ear canals and/or if you wish for maximal attenuation.
- People with snoring partners
- People with night and shift work.
- People who live in areas with lots of traffic noise, active nightlife, construction work etc.

Advantages:

- Sofeste, silicone-material for extra comfort
- Designed to allow you to sleep on the side
- Maximal attenuation with up to 35 dB.
- Alarm clocks, smoke alarms and intruder alarms can still be heard.
- Can be produced in many different colors.
