

Custom Passive Hearing Protection

SOWEI Unlimited

SOWEI Unlimited is Audiovox's custom passive hearing protection with a linear filter. The hearing protection is individually customized to fit your ear canals. The filter attenuates the sound linear on all frequency bands which means the sound quality is not compromised only lowered a bit. This is especially suitable for concert-enthusiasts or teachers in loud environments.

The hearing protection is compact and can be produced with a small handle which makes them easy to insert and remove. The hearing protection is made of soft, medical silicone and the filters allow for the ear to equalize pressure and for you to wear them hours on end without discomfort.

The noise filters for SOWEI Unlimited is available in four different versions with linear attenuation which makes them ideal for the user with need for communication.

Whether you are a teacher in a loud kindergarten, a dentist who have to rinse equipment several times a day or just enjoy going to concerts, a set of passive hearing protection from Audiovox can help you reduce the risk of tinnitus, headaches and hearing related damages.

Usage:

- Concert-goers
- Teachers in kindergarten or special-education programmes
- Dentists

Prevention:

- Hearing damages
- Tinnitus
- Sound sensitivity

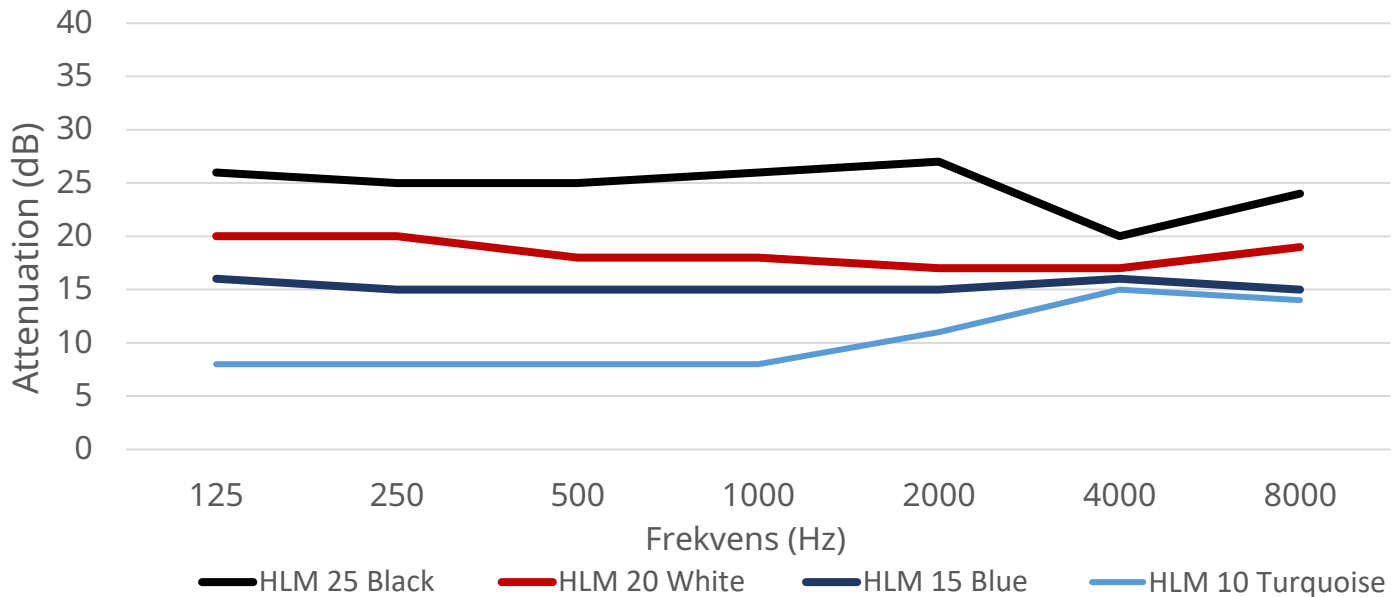

Advantages:

- Available with 4 different noise filters
- Soft and allergy friendly medical silicone
- Available in many different colors
- CE certified
